

冲孔网机 Perforation machine

冲孔网机器是指在不同材料上打上不同形状孔的设备。通常由控制机构，主机，送料机构组成。冲孔网产品应用及其广泛，其原材料通常有不锈钢板 低碳钢板 镀锌板 PVC 板 冷轧卷 热轧板 铝板、铜板等，网孔有 长方孔、方孔、菱形孔、圆孔、长圆孔、

六角形孔、十字孔、三角孔、长腰孔、梅花孔、鱼鳞孔、图案孔、八字网、人字孔、五角星形孔、不规则孔、起鼓孔、异型孔、百叶孔等。单独特殊形状可以单独定做。

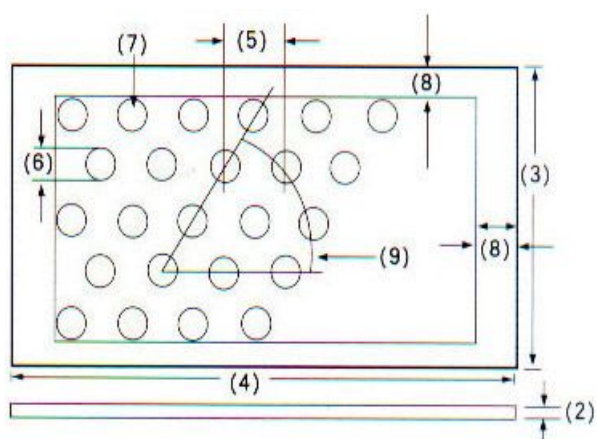

Perforation machine refers to perforate different holes in different materials. It is composed with the control mechanism, the host and the feeding mechanism. The perforation products has universally used in many fields, whose raw materials are usually Mild steel perforated metal screen; galvanized iron perforated metal screen; aluminum perforated metal screen; stainless steel perforated metal screen; perforated metal sheets of other materials.

Perforation patterns: Round perforations, square perforations, slotted perforations, fish scale perforations, hexagonal perforations, cross perforations as well as some other special patterns.
